range during that period. The Silver Cloud replaced the Silver Dawn and was, in turn, replaced by the Silver Shadow. The J. P. Blatchley design was a major change from the pre-war models and the highly derivative Silver Dawn. As part of a range rationalisation the Bentley S1 is very similar, apart from its radiator grille.

Many innovations were introduced with the Rolls-Royce Silver Cloud. Rolls-Royce chose the Silver Cloud to be their first model equipped with automatic transmission, power steering and power windows. Power originally came from their venerable straight six, but a new Rolls-Royce Silver Cloud II arrived in 1959 with a 6.2L V8. After studying many American designs, they took the best features of each V8 and built one of the smoothest running engines ever made.

The Silver Cloud was the last Rolls-Royce manufactured that employed body-on-frame construction; the days of cars being handcrafted by artisans in Crewe are now just a fond memory. However, that care and craftsmanship distinguish them from every other car ever created; the coach-built touches epitomize the style and grace of a classic Rolls-Royce and exemplify it as a

The Car's The Star [BBC 1995] - The Rolls-Royce Silver Cloud

The Silver Cloud III was the last Rolls-Royce model produced using body-on-frame construction, and the last example was finished by hand at the Crewe factory in 1966. Only 2,044 Silver Cloud III's were built during the short three-year production run, which was the lowest of all the Silver Cloud Series.

Story
The Rolls-Royce Silver Shadow is a full-sized luxury car produced by British automaker Rolls-Royce in various forms from 1965 to 1980. It was the first of the marque to use unitary body and chassis construction. The Silver Shadow was produced from 1965 to 1976, and the Silver Shadow II from 1977 to 1980. To date, the combined model run has the largest production volume of any Rolls-Royce.
