Mixtures And Solutions*

It is a mixture because mixtures are two or more ingredients mixed together. Salt and water are two ingredients. It's a solution because the salt dissolves and the water stays clear. All solutions are mixtures. Define 'dissolving'. a process in which a solid material seems to disappear into a liquid.

Sand, and silt (very fine soil) from the creek by the school. Students are divided into four groups and asked to predict how the samples will settle. Each of the four groups was given a clear, glass jar with the mixture. Each group predicted the order in which the materials in the mixture would settle.

(Solicit answers like: salt water, mud pies, bubbles, etc.) Solutions are types of mixtures, but mixtures can also be heterogeneous, where you can see the different ingredients separated out. Refer to the associated activity Messin' with Mixtures for students to further their understanding by investigating a heterogeneous mixture as environmental engineers analyzing a soil sample, using trail mix.

The Mixtures and Solutions
Module has five
investigations that engage
students with the phenomena
of matter and its
interactions in our everyday
life—mixtures, solutions,
solubility, concentration,
and chemical reactions. The
driving question is what is
matter and what happens when
samples of matter interact?

*Mixtures And Solutions Study
Guide - galileoplatforms.com*

Chemistry is the study of the structure of matter and the changes or transformations that take place within those structures. The Mixtures and Solutions Module introduces students to the properties, behaviors, and changes in substances—fundamental ideas in chemistry. Students also develop models to explain how something works.
