Disconnect the appropriate EXV valve from the pin header of the EXV module. 2. With a digital ohm-meter, check the resistance of the valve windings and associated leads/connector by measuring the resistance of pin pairs at the connector plug. Pin pairs are #5 and #3, #5 and #2, and #5 and #1 for Circuit 1.

The RTAA series features Trane's exclusive Adaptive Control™ logic with Clear Language Display. It monitors the control variables that govern the operation of the chiller unit . Adaptive Control logic can adjust these variables, when necessary, to optimize operational efficiencies, avoid chiller shutdown, and keep producing chilled water.
